

VYR-36 AG Full Circle

General properties:

- Medium flow agricultural impact sprinkler.
- 3/4" male or female connection.
- Made of plastic and stainless steel.
- High-resistance rotating joints.
- Nozzle angles of 25° and 25°.
- Used in full coverage irrigation with the best compliance with spacing standards in the market.
- Curved design of the internal angles of the body to avoid internal hydraulic turbulence and for greater reach.
- Stainless steel ball counterweights inserted in the arm.
- Plastic sprinkler, leader in the agricultural market.

Technical specifications:

- Range distance: 42,5-60 ft. (13-18 m).
- Flow: 175-865 GPH (660- 3270 l/h).
- Working pressure: 25-65 PSI (1,75 - 4,5 BAR).
- Area: Full circle.
- Nozzles: Two nozzles: one main nozzle and a secondary deflector nozzle or plug.
- Trajectory angles: 25° and 25°.
- Maximum stream height: 13 ft. (4,0 m).
- Rotation time: Depending on the pressure and the nozzles, the rotation will be constant and continuous.
- Uniformity coefficient higher than 90% in areas of 49x59R, 49x59T, 59x59T ft.

Applications:

- This model is compatible with almost any type of crop and with a wide range of pluviometric and spacing conditions, suitable for a large number of different crop types.
- Horticultural plantations, cereals, tubers, leguminous plants and fruit trees.

Dimensions:

- Height: 5,5 in. (14 cm).
- Width: 6,7 in. (17 cm).
- Weight: 0,39 lbs. (178 grs).
- Units per box: 100.

Options:

- Threads in BSP or NPT under demand.
- Models with anti-frost cover with male or female connection.
- Brass or plastic nozzles, depending on the customer's technical specifications.
- Secondary nozzle with deflector slot or plug.
- Assembled on a pressure regulator for self-compensation of pressure and flow.

Models:

- Ref. 003600: 3/4" male.
- Ref. 003602: 3/4" female.
- Ref. 003620: 3/4" male, anti-frost.
- Ref. 003622: 3/4" female, anti-frost.

STANDARD

- For optimum distribution avoid use in shady areas.
- Sprinklers will be supplied with standard nozzles unless otherwise specified.
- In order to calculate the flow, add the flows of the two nozzles. The range of the rear nozzle must be less than that of the main nozzle.
